Concept

"freedom of creativity"

Creating alternative eco-friendly furniture, with just one piece of furniture that you can Change according to your need, and bring your creativity to the floor and creating a new creative piece that is made specially for you.

Process

1st Stage (Metal)

Firstly I started by creating a metal frame to be served as the structure of the piece, then by following the first stage in the process I measured all the dimensions to make sure it's accurate to the drawings.

2nd phase (Metal treatment)

Connection parts are now attached to the pieces, followed by treating the metal to avoid any corrosion due to the weather.

3rd Stage (Accessories selection)

Indicate I indicated the accessories needed to assemble the parts easily.

Compare I compared the accessories in the market including the material, colour and size.

Select Selected the most suitable ones that fit the designed pieces

4th step

Weaving the material

Designed By: Roba Fouad

Under the supervision of Dr. Ola Hashem Dr. Ali Senosy

TA. Nada Shehab TA. Eslam Fawzy
